## PROJECTS

---

### 1. Catchwoo

Catchwoo is dating application for users. We are using SDK of ZegoCloud for video calling configuration and for messaging ZEGOCLOUD's chat SDK and UIKit. Integrate Payment gateway PAYG for buy coin.

### 2. Child Tracking

This project get calls, locations, messages, or even those late-night social media pings. But that's not it. It's like a safety locker too, keeping a backup of your data and making sure your phone is always in safe hands. With Phone Tracker, tracking background current location.

### 3. MGAS

This project helps to improve and enhance skill . He is a memory guru, motivational speaker and life changing counsellor. He was always appreciated for his motivational part. This project is made with the help team and College Faculty.

### 4. GrocecyItem

Collaborated with cross-functional teams, including UI/UX designers and backend developers, to ensure seamless integration of features and a user-friendly interface. Using Redux tool kit add item to cart.

### 5. Kaamkhatamkaro Vendor

This application provide home services. User Book services then nearby vendor confirm or transfer services and get coordinates using Library of geocoder.
